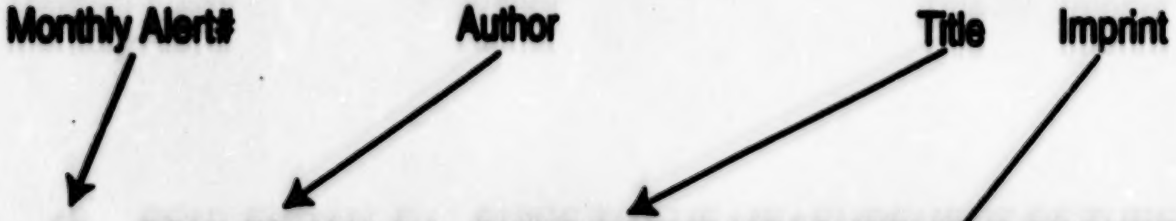
About the MONTHLY ALERT...

Sample *Monthly Alert* Citation:



49. SONDERMAN, D.L GUIDE TO THE MEASUREMENT OF THREE CHARACTERISTICS IMPORTANT TO THE QUALITY CLASSIFICATION SYSTEM FOR YOUNG HARDWOOD TREES/DAVID L. SONDERMAN. BROOMALL PA., 1979. 12 P. ILL. REFS. (U.S. FOREST SERVICE. NORTHEASTERN FOREST EXPERIMENT STATION. GENERAL TECHNICAL REPORT, NE-54) (PSW) (BLM) (RML) (WAU-FOR) 79-12-49.

The citations listed in this Alert are arranged in broad topical categories. This permits browsing by subject interest.

!!!! NEW FORMAT !!!!!

The BLM Library is trying out a slightly different format for the Monthly Alert, however there will be no changes in the way you order items. To order any item, you will still indicate the number of the item you are interested in on your order form.

In our new format, we have placed some citations under more than one subject heading if the contents of the item includes different subject areas. The Monthly Alert numbers are no longer strict numerical order.

In addition, you may have noticed different subject headings in the past few Alerts. We would like to gear these towards subject headings you will instantly identify with your field of interests. Please let us know if any are way off base, or if you would like to add other subject headings.

Are you.....

***** Only interested in the Table of Contents for certain journal titles ???*****
***** The type who loves receiving E-mail ???*****
*****Interested in getting articles every month on a certain subject ???*****

....then ***UNCOVER REVEAL*** may be just what you are looking for !!!

The BLM Library is testing a pilot program in "push technology". Simply choose up to 50 journal titles and their Table of Contents will automatically be sent to your E-mail mailbox as the journals are published. In addition, you can have citations for articles BY SUBJECT sent to your E-mail mailbox.

IF YOU ARE INTERESTED IN PARTICIPATING IN THIS PILOT PROGRAM, OR NEED MORE INFORMATION, PLEASE CONTACT JOAN PENZIEN at the BLM LIBRARY: (303-236-6633) (joan_penzien@blm.gov)

About Bureau of Land Management *MONTHLY ALERT*

Bureau of Land Management ***Monthly Alert*** announces recent publications significant to natural resources management and research. Subject areas are generally limited to renewable resources and fire management.

Most items listed in each ***Monthly Alert*** are reprints of current journal articles or research papers. They are sent to you at your office without charge upon receipt of you order (see inside back cover). Books and other large documents will be lent to you for a specific period of time. Those items available for <u>loan only</u> are identified by a ● beside the item in the citation.

The ***Monthly Alert*** is available to all BLM employees. It is produced by the BLM Library.

About the BLM Library

The BLM Library, part of the National Applied Resource Sciences Center is located in Denver. We perform a full range of library services for all BLM personnel at no charge. We offer computer-based literature searching for all subject areas. Literature searches may be requested by calling the reference number below. The BLM Library has access to libraries of every government agency, universities, private institutions and foreign governments. If you have need for library assistance contact:

RECENT ADDITIONS
Book List

Recent Additions Book List is a monthly listing of book titles that have recently been added to the BLM Library collection and are available for loan via the *Monthly Alert* order form. Each list is arranged by various subject headings in alphabetical order and shows author, title, and date. Each title will be assigned a specific "R" number for ordering purposes. This "R" number is the order number that should be entered onto the *Monthly Alert* request form. Note that a title may be listed more than once due to the various subject headings assigned to it.

SAMPLE CITATION

Subject Heading → R1. ACID DEPOSITION-CANADA

Title of Book ↓

Pawlick, Thomas. A killing rain : The global threat of acid precipitation.
San Francisco : Sierra Clubs Books, c1984.

TO REQUEST MATERIALS: Write the order number (ex. R1) on the request form. No other information is necessary. It is important to include the letter "R" along with the assigned number so that it can be distinguished from the numbered items in the regular Monthly Alert .

LOAN PERIOD: Reserve lists will be created for each title requested and the books will be loaned to those on the lists for a period of two weeks. If you need any item on a rush basis, please call the BLM Library at 303-236-7342 to make special arrangements.

ORDERING INFORMATION: Contact us for ordering information if you would like to purchase any of the books listed at 303-236-6833.

BOOK REVIEWS

J 01 Restoring Life in Running Waters: Better Biological Monitoring.
James R. Karr and Ellen W.Chu. Island Press, Washington, D.C., 1999.

"Concerned about the continuing decline in the quality of the nation's waters, James R. Karr and Ellen W. Chu have written a book that they hope will encourage effective use of biological data in resource management decision making. They argue that the Clean Water Act has failed to protect the integrity of US aquatic resources because its emphasis on the chemical quality of water fails to address other water quality issues and because some popular engineering practices implemented as a consequence of the act (e.g. chlorination) are ultimately counterproductive. According to Karr and Chu, better resource management will occur when managers have access to tools such as integrated indexes of biological integrity (IBIs), which allow them to make decisions based on the biological quality of the system. Their book makes a case for more widespread use of integrated indexes and answers critics' concerns about the use of such indexes." Bioscience, Oct. 1999, pp.827-828

J 02 Measures of Success: Designing, Managing and Monitoring Conservation and Development Projects.
Margouluis R., and N. Salafsky. 1998. Island Press, Washington, D.C.

" Measures of Success is a thorough and comprehensive approach to identifying the elements of systematic conservation work.....project design, management, and monitoring..... The authors begin at the beginning and take the reader through setting a mission, goal and strategy; defining outcomes and obstacles to achieving those outcomes; creating a plan to monitor progress toward those outcomes; implementing these plans; and evaluating results and taking adaptive action.... This book is a good reminder of what we need to do to make good decisions." Conservation Biology, Oct. 1999, pp. 1228-1229.

J03 Arid Lands Management: Toward Ecological Sustainability.
Thomas W. Hoekstra and Moshe Shachak , Technical editors. 1999. University of Illinois Press, Urbana and Chicago.

"The purpose of the workshop on Arid Lands Management: Toward Ecological Sustainability, which culminated in this volume, was to establish the state of knowledge on arid lands ecological systems and their management..." .Titles in the Table of Contents are : Part 1: The Ecological Framework for Sustainability; Part 2: Ecological Systems and Their Management; Part 3:Arid Lands Management Principles and Analyses; Part 4: Progress toward Ecological Sustainability.

J04 For the Health of the Land.
Aldo Leopold. 1999. Island Press, Washington, D.C.

This is a collection of environmental essays, most never published, from the conservationist icon, Aldo Leopold. Full of wit and folksy ethics, they chronicle the evolution of Leopold's thinking from his early endorsement of the land-use sensibility of Gifford Pinchot to his later entreaty to protect the land and biodiversity.
